JESUS MANUEL MARTÍNEZ SERPA

Frontend Developer | React · TypeScript · JavaScript (ES6+) · AI Integration

Montería, Córdoba, Colombia · **Phone:** +57 304 296 2947 · **Email:** jesusmanuelserpa23@gmail.com

PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of hands-on experience building scalable web applications using React, TypeScript, and JavaScript (ES6+). Specialized in AI integration through language model APIs (Gemini), REST API consumption, and performance optimization with Vite. Proven track record developing and deploying production-ready applications with clean, component-based architecture. Strong attention to responsive design, accessibility (WCAG), and Core Web Vitals performance. Intermediate technical English (B1+) — able to read documentation, collaborate in English, and write clean code comments. Eager to contribute to agile teams focused on high-impact frontend products.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3
- AI & APIs: Gemini API integration, REST APIs, async/await, Axios, Fetch API, prompt engineering
- Build Tools & DevOps: Vite, Git, GitHub, GitHub Actions (CI/CD), Netlify, Vercel
- UI & Design: Responsive Design, Mobile-First, CSS Grid, Flexbox, Accessibility (WCAG)
- Methodologies: Clean Code, Component-Based Architecture, Version Control (Git Flow), Agile/Scrum
- Testing: Jest (basic), React Testing Library (basic)

WORK EXPERIENCE

Frontend Developer — Independent / Open Source Projects | *January 2025 – Present*

Designed, developed and deployed multiple production-ready web applications, demonstrating end-to-end ownership from architecture to deployment.

- **Gemini AI Clone — Built a professional-grade AI chat interface using React and TypeScript, integrating Google's Gemini API for real-time language model responses. Implemented prompt engineering logic, streaming rendering, and global state management. GitHub: github.com/jesusmandev/gemini-clon**
- Dynamic GIF Search App — Developed a React application consuming Giphy's REST API with asynchronous search, debouncing, global state management and fully responsive mobile-first layout. Deployed on GitHub Pages. Live: jesusmandev.github.io/GIF-app/
- Professional Portfolio — Built a Vite + React optimized portfolio site with a Lighthouse performance score above 90, focused on accessibility, SEO, and fast load times. Live: jesusmandev.github.io/portfolio-website/
- Component Architecture Systems — Developed reusable UI components using Next.js and CSS3, prioritizing rendering efficiency, code reusability and separation of concerns.

EDUCATION & TRAINING

React: From Zero to Expert (Hooks & MERN) | *Udemy — Completed 2024*

200+ hour course covering React Hooks, Context API, Redux, MERN stack, testing and performance optimization.

Web Development Fundamentals | *Platzi — Completed 2024*

Programming logic, algorithms, HTML5, CSS3, JavaScript fundamentals, and version control with Git.

Intensive English Program (B1+) | *Universidad de Córdoba — In Progress*
Technical English focused on reading documentation, professional writing, and communication in tech environments.

Health Administration — B.S. | *Universidad de Córdoba — In Progress*
Complementary academic formation; primary professional focus is software development.

CERTIFICATIONS

- React: De Cero a Experto — Udemy (2024)
- Programación Básica — Udemy (2024)
- Curso de Programación Básica — Platzi (2024)
